Davinder-

Thanks for your reply. I was just going through my Junk folder in my email and noticed that this message was sent to Junk, which is annoying but hopefully I have it fixed. I'm glad the reports are working for you. Let me know if something changes.

Hi Brooks,

Thank you for the updates. We do not have any questions at this time. Thanks for reaching out to us.

too bad Parm could not be there on site.

It is fine just to send to this email address.

Regards,  
Davinder

**Subject:** PolReps

Greetings Parm & Davinder-  
I hope this message finds you well and enjoying the tail end of our summer.

By now you should have received four "PolReps" we have been generating to document progress on our project. I sent these just to Parm's email address up to now not realizing that I've had Davinder's email all this time as well. I will begin including Davinder on the distribution list going forward and send all previous reports if she would like. Just let me know.

These reports will hopefully continue to come out every two weeks or so for the duration of this project. We make them available to partner agencies, property owners, and other key people associated with the project. For public audiences, we typically use other more generic reports and press releases.

There is a lot covered in these PolReps, but they can't capture everything. If either of you are interested in a project update over the phone to supplement what you're reading in the reports, I'd be glad to find a time with just the two of you or whoever else you'd want to participate.

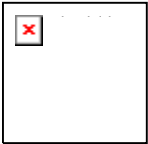

Let me know whenever it is convenient for you.

Sincerely,

Brooks Stanfield
